

Sharon Van Etten - Seventeen

```
Now you're a hotshot
                            tom:
                Bb (forma dos acordes no tom de G )
Capostraste na 3º casa
                                                               Hanging on my block
                                                               Sun coming up
            [Primeira Parte]
                                                               Who's my shadow?
                                                                [Ponte]
I know what you wanna say
I think that you're all the same
                                                               La-la-la-la-la-la
Constantly being led astray
                                                               La-la-la-la-la-la
You think you know something you don't
                                                               La-la-la-la-la-la
[Refrão]
                                                               La-la-la-la-la-la
Downtown hotspot
                                                                [Terceira Parte]
Halfway up the street
                                                               I know what you're gonna be
I used to be free
                                                               I know that you're gonna be
I used to be seventeen
                                                               You're crumbling it up just to see
Follow my shadow
                                                               Afraid that you'll be just like me
Around your corner
                                                                [Refrão]
I used to be seventeen
Now you're just like me
                                                               Downtown hotspot
[Segunda Parte]
                                                               Halfway through this life
                                                                I used to feel free
Down beneath the ashes and the stone
                                                               Was it just a dream?
Sure of what I've lived and have known
                                                               Now you're a hotshot
I see you so uncomfortably alone
                                                               Think you're so carefree
I wish I could show you how much you've grown
                                                               But you're just seventeen
[Refrão]
                                                                So much like me
Downtown hotspot
                                                               You're just seventeen
I used to be on this street
                                                                You're just seventeen
I used to be seventeen
                                                               Seventeen
I used to be seventeen
                                                                [Final] G
