

Shawn Mendes - One Of Those Nigths

```
Verso:
                                                                One of those nights we felt invincible
 Time up in the middle of a daydream
                                                                And every glass was full,
                                                                One of those nights
 Call you up 'cause the time is wasted
                                                                                              Dm
Let's drive we got nowhere to go
                                                                One of those nights, dancing in the stars
Fear not, yeah, welcome to the jungle
                                                                Thought that the world was ours,
                  G
 Think fast, move quick, don't stumble
                                                                One of those nights
                   Е
                                                                Ponte:
We can't do this alone
Pré-Refrão:
                                                                Wanna hold on tight to a little of this
                                                                 The kinda night you don't want to miss
Where do we go? We don't know
                                                                Time of our lives,
           Am
Follow the wind where it blows
                                                                One of those nights
Let's make mistakes and don't look back, it's now or never
                                                                Wanna hold on tight to a little of this
                                                                The kinda night you don't want to miss
One of those nights we felt invincible
                                                                Time of our lives,
                                                                One of those nights
And every glass was full,
One of those nights
                                                                Go home it's over, but it's not the end
                                                                                        Dm F
One of those nights, dancing in the stars
                                                                Don't wait 'til you're older to begin
                                                                             Dm F
Thought that the world was ours,
                                                                Keep your composure and innocence
One of those nights
                                                                Where do we go? We don't know
Verso:
                                                                One of those nights, we're driving around
                                                                In this boring ass town
                                                                One of those nights
 We're young, live with no fear
 Kids running wild, girls crying drunk tears
                                                                Wanna hold on tight to a little of this
                                                                The kinda night you don't want to miss
 We don't have this time for long
                                                                Time of our lives,
                                                                One of those nights
Yeah, we make big plans, spending all our change
                                                                One of those nights we felt invincible
Caught up in the night, oh we missed the last train
                                                                And every glass was full,
                                                                One of those nights
It's our time and we're leaving home
                                                                One of those nights, dancing in the stars
                                                                Thought that the world was ours,
Pré-Refrão:
                                                                One of those nights
                                                                Wanna hold on tight to a little of this
Where do we go? We don't know
                                                                The kinda night you don't want to miss
                                                                Time of our lives.
           Am
Follow the wind where it blows
                                                                One of those nights
Let's make mistakes and don't look back, it's now or never
                                                                One of those nights, where she turns those lights down
                                                                And it's only us now,
                                                               One of those nights \\
