

Shinedown - 45 Acoustic

Tom: **C**

This is about 98% correct. It's my first tab and I'm pretty real... sure its correct except for the strumming rythm and i didn't tab for timing but the notes should be correct. So just listen to the album to get it can do that, right? Oh and if the tab looks messed up just save it as a text file and open it with notepad and it should be right.
