```
    Am                                C
The first time I ever saw you
F                                          E
You had that far away look in your eyes
Am                          C
And heaven's eyes shined down upon you
F                                    E
And the whole room filled up with light

Am                          C
Now the cruel world it's gonna try and change you
F                                        E
Try to hang you up and mess with your pride
Am                          C
Now the rich just try to chain you
F                                    E
You got to keep your fire burning inside
