

Sleep Token - The Apparition

tom:

Why are you never real?

Whenever you appear

You leave me with that grace

I am trembling with fear

But I know that you will disappear

Just as I awake

Whisper in my ear

Well I believe

Somewhere in the past

Something was between

You and I my dear

And it remains

With me to this day

No matter what I do

This scar will never fade

So let's make trouble in the dream world

Hijack heaven with another memory now

I make the most of the turning tide

It just split what's left of the burning silence

Don't wait, cause this could be the last time

You turn up in the reveries of my mind

I wake up to a suicide frenzy

Loaded dreams still leave me empty

I believe

Somewhere in the past

Something was between

You and I my dear

And it remains

With me to this day

No matter what I do

This wound will never heal

Why are you never real?

The shifting states you follow me through

Unrevealed

Just let me go or take me with you

Acordes
