

## Sleeptoken - Rain

```
The mouth of the wolf, the eyes of the lamb
                tom:
                                                                                       Bm7
                                                                So darling, will you saturate?
       Am
                               Fm
For so long, I have waited
                                                                And just like the rain
So long that I almost became
                                                                You cast the dust into nothing
Just a stoic statue, fit for nobody
                                                                And wash out the salt from my hands
And I don't wanna get in your way
                                                                So touch me again
                                                                           C
But I finally think I can say
                                                                I feel my shadow dissolving
That the vicious cycle was over
                                                                Will you cleanse me with pleasure?
The moment you smiled at me
                                                                Nobody can say for certain
And just like the rain
                                                                If maybe it's all just a game
You cast the dust into nothing
                                                                When I open my eyes to the future
    D
And wash out the salt from my hands
                                                                I can hear you say my name
{\rm Bm7}
       D
                                                                                  G7M
       touch me again
                                                                So rain down on me, whoa
          Em
                                                                                Em
I feel my shadow dissolving
                                                                Rain down on me, whoa
          \mathsf{Am}
                                                                                 Em
Will you cleanse me with pleasure?
                                                                Rain down on me, whoa (hey-yeah)
It's that chemical cut that I can get down with
                                                                Rain down on me
Up like the moon and out like the hounds
                                                                                  Bm7
                                                                          Em
                                                                Rain down on me (yeah)
A dangerous disposition somehow refracted in light, reflected
                                                                          Em
                                                                Rain down on me, whoa
in sound
  Em
                                                                          D Em Bm7
                                                                Rain down on me, whoa
I'm coiled up like the venomous serpent
Tangled in your trance and I'm certain
                                                                            Am
                                                                Rain down on me, whoa
You have got your hooks in me
                                                                            Em D
                                                                Rain down on me
Am
I know, I know, the way that it goes
                                                                             Αm
You get what you give, you reap what you sow
                                                                Rain down on me, yeah
                         D C
                                                                             Em
And I can see you in my fate
                                                                Rain down on me
I know, I know, I am what I am
```

## **Acordes**
