

## **Snow Patrol - This Isn?t Everything You Are**

```
Just take the hand that's offered
 (com acordes na forma de
                                             G )
                                                                And hold on tight
Capostraste na 4º casa
Intro:
                                                                D2
                                                                This isn't everything you are
           D2
You can't find the phone, so you can call it off
                                                                There's joy not far from here, right
But it might be for the best
                                                                I know there is
                D2
You can't walk away, anyway
                                                                This isn't everything you are
               G
Cause you've nowhere else to go
                                                                ( D2 Em G G )
Is he worth all this, is it a simple yes?
                                                                When you took the call
               G
Cause if you have to think, it's fucked
                                                                          Em
                                                                How could you know
               D2
Feels like you loved him more, than he loved you
                                                                That he'd slipped away last night
And you wish you'd never met
                                                                           D2
                                                                                    Em
            D2
                                                                And you wish you went home, days ago
Don't kill love now
                                                                To say goodbye or just hello
Don't kill love
                                                                             D2
Don't kill love now
                                                                Don't kill love now
Don't kill love
                                                                Don't kill love
(Continua como na intro)
                                                                Don't kill love now
                                                                Don't kill love
You've been up all night, and the night before
You've lost count of drinks and time
                                                                And in one little moment
                D2
And your friends keep calling, worried sick
                                                                It all implodes
There's strangers everywhere
                                                                This isn't everything you are
            D2
Don't kill love now
                                                                Breathe deeply in the silence
Don't kill love
                                                                No sudden moves
Don't kill love now
Don't kill love
                                                                This isn't everything you are
Refrão:
                                                                Just take the hand that's offered
And in one little moment
                                                                And hold on tight
                                                                D2
                                                               This isn't everything you are
It all implodes
This isn't everything you are
                                                                There's joy not far from here, right
                                                                Em
Breathe deeply in the silence
                                                                I know there is
No sudden moves
                                                                This isn't everything you are
This isn't everything you are
                                                                Final: G Em D2 Cadd9
```
