Nothing is holding you back now

No one can push you around

What do you wanna do?
                                                               It's my thought, it's my thought, it's my words, it's my voice
You're the master of you
And isn't the thought enough to lift you off of the ground?
