

## Switchfoot - Chem6a

Tom: **G**

Main Riff

The second riff is just a variation, not much difference

After repeating this a couple of times, it goes to

Then comes the chorus, you'll have to figure out the rhythm, its not that hard.

1st Ending

First Solo

After that there is a break where it is just bass then play the main riffs a number of times

then do the chorus (the only difference in the second chorus is that you repeat the ending instead of playing it just once) and then we get to solo number 2

End Riff 1

End Riff 2

After doing the second end riff, you just play the first end riff two more times and end song by letting the 12 ring out

I hope that this tab comes in handy, if you have any questions comments or corrections, can email me at [god\\_bless@ukulele-chords.com](mailto:god_bless@ukulele-chords.com) God Bless
