SYML - The Dark

```
                        tom:
                           G
Intro:  C   D   Em   G   C
```

```
Em                   D        C  C7M
My fire is starved of oxygen
C                 D          Em
A flicker in the howling wind
C                 D          Em
Beware the night is closing in
                          D        G
And if I fall asleep, the shadows win
```

```
        Em              D         C
Well the darkness came to take my faith
                         D        Em
It tried to steal my words to pray
     C               D        Em
My love came down like holy rain
                 D     G    D  G  C  D  D
And she became my God that day
```
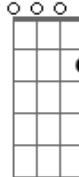

```
Em                D       G
And she became my God that day
```

```
Em                D        C
She taught me how to think out loud
                  D          Em
To listen when there ain't no sound
```
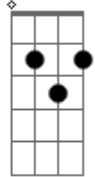

```
C                  D            Em
To love myself through all the doubt
                        D  G    D  G  C  G  D
To sing and make my mother proud
```
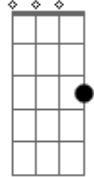

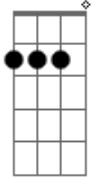

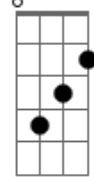

```
        Em              D     G    D  G  C  G  D
Oh, to sing and make my mother proud
```

```
          Em             D       G
Mmm, to sing and make my mother proud
```

```
          Em            D     C
In the dark I learned to love again
                        D     Em
A sacred place it's always been
         C             D     Em
Where souls depart and life begins
                      D     G
The dark led me to light again
          Em           D  G    D  G  C  G  D
Yeah, the dark led me to light again
```

```
          Em                D     G    D  G  C  G  D
Yeah, the dark led me to light again
```

```
          Em                D     G
Yeah, the dark led me to light again
```

```
[Final]  C   D   Em   G   C
```
