

Taylor Swift - Long Live

```
Intro: G C Em D C
                                                                Long live all the mountains we moved
                                                                I had the time of my life
                                                                Fighting dragons with you
Verso 1:
                                                                I was screaming, "long live the look on your face"
I say remember this moment In the back of \ensuremath{\mathsf{my}} mind
The time we stood with our shaking hands
                                                                And bring on all the pretenders
The crowds in stands went wild
                                                                One day we will be remembered
                                                                Ponte:
We were the kings and the queens
                                                                Hold on to spinning around
And they read off our names
                                                                Confetti falls to the ground
The night you danced like you knew our lives
                                                                May these memories break our fall
Would never be the same
                                                                Verso 3:
You held your head like a hero On a history book page
                                                                And you take a moment
It was the end of a decade But the start of an age
                                                                Promise me this:
Refrão:
                                                                That you'll stand by me forever
Long live the walls we crashed through
                                                                But if God forbid fate should step in
All the kingdom lights shined just for me and you
                                                                And force us into a goodbye
I was screaming, "long live all the magic we made"
                                                                If you have children someday
And bring on all the pretenders
                                                                When they point to the pictures
One day we will be remembered
                                                                Please tell them my name
Verso 2:
                                                                Tell them how the crowds went wild
I said remember this feeling I passed the pictures around
                                                                Tell them how I hope they shine
                         Em
Of all the years that we stood there on the sidelines
Wishing for right now
                                                                Long live the walls we crashed through
We are the kings and the queens You traded your baseball cap
                                                                I had the time of my life with you
                                                                Long, long live the walls we crashed through
When they gave us our trophies And we held them up for our
                                                                All the kingdom lights shined just for me and you
And the cynics were outraged Screaming, "this is absurd"
                                                                I was screaming, "long live all the magic we made"
'Cause for a moment a band of thieves in
                                                                And bring on all the pretenders I'm not afraid
                                                                Long live all the mountains we moved
ripped up jeans got to rule the world
                                                                I had the time of my life
Long live the walls we crashed through
                                                                Fighting dragons with you
All the kingdom lights shined just for me and you
                                                                long live the look on your face
I was screaming, "long live all the magic we made"
                                                                And bring on all the pretenders
And bring on all the pretenders I'm not afraid
                                                                One day we will be remembered
