                                                                Chorus:
Email:
                                                                How can I ever try to be better?
Tuning: Capo 1
                                                                Nobody ever lets me in
Intro: E B Gbm A
                                                                I can still see you, this aint the best view
  E B Gbm A
                                                                On the outside looking in
                                                                I've been a lot of lonely places
I didn't know what I would find
                                                                I've never been on the outside
When I went looking for a reason, I know
                                                                Interlude:
I didn't read between the lines
                                                                                                   E B
                                                                How can I ever try to be better?
And, baby, I've got nowhere to go
I tried to take the road less traveled by
                                                                Nobody ever lets me in
But nothing seems to work the first few times
                                                                I can still see you, this aint the best view
Am I right?
                                                                On the outside looking in
                                                                I've been a lot of lonely places
Chorus:
  F
So how can I ever try to be better?
                                                                I've never been on the outside
Nobody ever lets me in
                                                                End of chorus riff:
I can still see you, this aint the best view
                                                                Outro:
On the outside looking in
                                                                E B Gbm A
I've been a lot of lonely places
                                                                E B Gbm
I've never been on the outside
End of chorus riff:
                                                                To play with capo on 3:
                                                                Chords:
Verse:
          R
                                                                R
You saw me there, but never knew
                                                                Gbm = Em
I would give it all up to be
                                                                Dbm = Bm
                                                                Intro: /Outro:
A part of this, a part of you
And now it's all too late, so you see
                                                                End of chorus riff:
You could've helped if you had wanted to
                                                                Interlude:
```

But no one notices until it's too
