

Thalles Cabral - Just When We Were High

```
Tom: Db
                                                                In a beautiful night sky
 (com acordes na forma de B )
Capostraste na 2ª casa
Intro: Abm E Gb Bb
                                                                You loved to dance Nirvana like a fucking crazy
                                                                You said Lithium was the best song ever made
I've been walking for twenty-two miles from home
                                                               Nights were your companion to set all in flames
                   Gh
And I want you to know
I've never forgot you
                                                                Oh, I loved you so
                                                                But just when I was high
All I have with me is my smoke and a phone
                                                                And out of my mind
In case you call
                                                                Abm
To let me know that you've come
                                                                Oh, you loved me so
                                                                But just when you were high
To meet me where we used to stay 'till late
                                                                            Bb
                                                                And out of your mind
Every night to watch the car races
With our old friends, getting hallucinated
                                                                You left me alone in this dark night
                                                                You pulled my heart on the roadside
I?m at the gas station, the only place around
                                                                And you drove fast far away from me (till forgetting)
I can no longer see any light of town
                                                                Ahm
And I'm here just waiting
                                                                You left me alone on this dark side
                                                                We loved each other just when we were high
Oh, I loved you so
                                                                I shut my eyes and I think I made you up inside my head
But just when I was high
                                                                Abm
And out of my mind
                                                                Oh oh oooooh
                                                                Oh oh oooooh
Oh, you loved me so
                                                                      Gb
                                                                Ooooooooooh
But just when you were high
           Bb
And out of your mind
                                                                Oh oh oooooh
                                                                Oh oh oooooh
You left me alone in this dark night
                                                                     Gb
                                                                0ooooooooh
You pulled my heart on the roadside
And you drove fast far away from me (till forgetting)
                                                                And I wait for you (And I wait for you)
                                                                And I pray for you (And I pray for you)
You left me alone on this dark side
                                                                     Bh
                                                                And I think of you
We loved each other just when we were high
                                                                Because I love you
                                      Bb
I shut my eyes and I think I made you up inside my head
                                                                      Ahm
(E Gb Bb)
                                                                And I wait for you (And I wait for you)
                                                                And I pray for you (And I pray for you)
You broke my soul into thousands of parts
                                                                     Rh
               Gb
                                                                And I think of you
Like a million stars
                                                                          Gb
                                                                Because I love you so
