The Aces - Bad Love

```
                              tom:
                 C

                        C
I can't help it
Em                          D       Am
The way I feel you in my bones
                 C
Don't mind the judgement
Em                            D         Am
You wrap me up when we're alone

C
They don't really need to know our business
Em
They don't really need to know what we do
D
They don't really need to know where we go
Am
When it's just me and you
C
Got you touchin' on me all in secret
Em
Want you lovin' on me all four seasons
D
Baby, tell me who we think we're pleasin'
Am
I wanna be with you

C                                Em
Baby, they don't get us, never had this love before
             D                                        Am
I wish they know just how I felt, think they'd be ready to
adore you
 C                          Em                                      D
How could they call this bad love when all I want is more?
                        Am
When all I want is more?

                 C
It's gettin' heavy
Em                          D     Am
Oh I can see it on your face
                 C
Oh, if you let me
 Em                    D                 Am
Then I will love you all over the place

C
They don't really need to know our business
Em
They don't really need to know what we do
D
They don't really need to know where we go
Am
When it's just me and you
C
Got you touchin' on me all in secret
Em
Want you lovin' on me all four seasons
D
Baby, tell me who we think we're pleasin'
Am
I wanna be with you

C                                Em
Baby, they don't get us, never had this love before
             D                                        Am
I wish they know just how I felt, think they'd be ready to
adore you
 C                          Em                                      D
How could they call this bad love when all I want is more?
                        Am
When all I want is more?

 C                                Em
Baby, it's no secret, we can't hide it anymore
             D                                          Am
I wish they know just how I felt, oh don't they know that I
adore you?
C                          Em                                        D
How could they call this bad love when all I want is more?
                        Am
When all I want is more?

C           Em              D
More, more, more, more, more-ore
       Am
I'm addicted to you
C           Em              D
More, more, more, more, more-ore
       Am
I'm addicted to you

C                                Em
Baby, they don't get us, never had this love before
             D                                          Am
I wish they know just how I felt, think they'd be ready to
adore you
 C                          Em                                      D
How could they call this bad love when all I want is more?
                        Am
When all I want is more?

 C                                Em
Baby, it's no secret, we can't hide it anymore
             D                                          Am
I wish they know just how I felt, oh don't they know that I
adore you?
C                          Em                                        D
How could they call this bad love when all I want is more?
                        Am
When all I want is more?
```
