The Calling - Things Don´t Always Turn Out That Way

Tom: F

G, A,A#,C) palm muted até a o refrão

```
         G     A       Bb      C
Well he can't sleep at night
         G    A        Bb      C
And he can't do what's right
           G              A            Bb      C
It was all because she came into his life
         G              A             Bb       C
It's a deep obsession, taking up his time

Chorus:
                    C                          F
She's all that he wants, she's all that he needs
                  Bb                  G
She's everything he just won't believe
               C                     F
Take away his doubt, turn him inside out
                  Bb                        G            C
Then she can see what he's been dying to say
                   F                                      G
But things don't always turn out that way
        A      Bb        C
And he must confess
           G                          A        Bb          C
All the impure thoughts of his beautiful temptress
             G          A            Bb          C
```

```
Although he keeps it all bottled up inside
          G                A               Bb    C
Although he keeps it all safe within his mind, oh yeah

Chorus
                      C                          F
She's all that he wants, she's all that he needs
                    Bb             G
She's everything he just won't believe
                   C                      F
Take away his doubt, turn him inside out
                    Bb                 G       C
Then she can see what he's been dying to say
                      F                                  Bb
But things don't always turn out that way

    Eb             Gm                   Eb
       So wipe that smile off your face
          Gm               Eb
Before it gets too late
         Gm              C7
There's only so much time
           F
For you to make up your

Chorus
