

The Cranberries - I Really Hope

```
Intro: 4x: Dm F C Am
I've Been Down This Road Before
Now i'm coming back for more
This is like a deja vu,
        F
i was born to be with you
               C
Into the night we went to sleep
               C
You and I were ment for keeps
             C
Into the night, we went to play, you and I
Refrão:
I really hope you'll always be, so in love with me
                           Bb
        Dm
                                     Am
I really hope we'll always stay, so attached this way (2x)
So beware of the pitfall
We don't have to change at all
And our light will not burn out
        F
              C
It's what freedom's all about
Into the night we went to sleep
```

```
You and i were ment for keeps
               C
Into the night, we went to play, you and I
                            Bb
                                      \mathsf{Am}
I really hope you'll always be, so in love with \ensuremath{\mathsf{me}}
                           Bb
                                     Am
I really hope we'll always stay, so attached this way
                            Bb
I really hope you'll always be, so in love with me
                           Bb
I really hope we'll always stay, so attached this way
(Dm F C Am)
         Dm
                            Bb
                                      Am
I really hope you'll always be, so in love with me
         Dm
                           Bb
                                     Am
I really hope we'll always stay, so attached this way
                            Bb
                                      Am
I really hope you'll always be, so in love with me
         Dm
                           Bb Am
I really hope we'll always stay, so attached this way
                           Bb
I really hope that we'll always be here
        Dm
                          Bb
I really hope that you'll always be near
                                                C
                          Bb
Take me and break me, i'll always be here
                           Bb
I really hope that you'll always be near
```
