

## The Joy Formidable - Into The Blue

```
But please pull me closer
               tom:
                                                              Don't fear the move out of the past
Intro: D Bm D Bm
                                                              Let time take your hand and guide you
[Primeira Parte]
                                                              It's time to move
                                                                                  Bm D A
You see me for what I am
                                                              Into the blue once again
I don't have to guess anymore
                                                              (DBm DBm)
                                                              ( D Bm )
That slow doubt that won't speak up
                                                              [Terceira Parte]
Gets just enough then withdraws
'Cause things go bad but it's real and there
                                                              I know it's rare when you tremble again
                    D
Better than slowly emptying me
                                                              Remember what others have lost
Into the blue
                                                              Go back to the place that we won't go again
Into the blue once again
                                                              Did I make the most of it before?
[Refrão 1]
                                                              I go back to the place that we won't go again
                                                                                D A
                                                              To live it over and over
Just one big wave
                                                              Into the blue
Just one big wave
                                                              Into the blue once again
Just one big wave
                                                              [Refrão Final]
[Segunda Parte]
                                                              Just one big wave
  When I watch you from across the way
                                                              Just one big wave
Everything's still until I hold you again
                                                              Just one big wave
  Just that moment of being attached, let it split you in two
                                                              [Parte Final]
                    Fm
'Cause I'll be here, inside, outside
                                                               G
Grateful that we at least felt something
                                                              Don't fear the move out of the past
   G
We went into the blue
                                                              Let time take your hand and guide you
Into the blue once again
                                                              Into the blue
[Ponte]
                                                              Into the blue
                                                                                D
                                                              Into the, into the outside without you
'Cause now I see this place was here all along
                                                              ( G Em Bm D A )
                                                              (GEmBm)
The more it changed shape
You pull it close
                                                              [Final] D Bm D Bm
