

The Reing Of Kindo - Catch The Gleam

tom:

Intro: **Dm** **Em** **A** **Dm** **Em**

What I found is golden
Set sail in a dream
Waves upon the ocean
Beneath sky serene

You should see it with your own eyes
The things we never notice
You can see it with your own eyes
Keep you burning bright

What I found is golden
Set sail in a dream
Taken to the shoreline
And begin to catch the gleam

As the story unfolds
From the darkest of hours
You can see the whole world spring the line
And don't hesitate to consider the possibility

Sometimes you might lose your way
And sometimes we wonder how
We'll make it through the day
Through the day

Sometimes we all fall apart
And you know the sunlight
Hides behind the skies of grey
Skies of grey

(**E** **D** **E** **D**)

Words cannot be spoken
And fail to describe
The depth of our emotions
From canyon to sky

Well I can't understand
Why the wind blows me in
