## The Rolling Stones - Let Me Down Slow

```
Tom: E
                                                                  But the first one to blink
Intro: E
                                                                                      Gbm
                                                                  Is the first one to fall
Verse:
                                                                                Α
                                                                  I don't want a confrontation
                                                                                    В
You look a little dressed up
                                                                  I've got my back to the wall
                      R
You're acting way too smart
                                                                  Chorus:
                                                                               Α
Your face a little bit flushed
                                                                  Why I said, baby, baby
                  В
                                                                  Gbm
                                                                             E
For a walk in the park
                                                                  let me down real slow
                           F
                                                                          В
                                                                  E
And you're clutching your phone
                                                                  Oh no no no
                   B
                                                                  Why I said, baby, baby
As you walk in the dark
                                                                  Gbm
                       F
                                                                             F
                                                                  let me down real slow
And your smile's got a twist
                    В
                                                                      В
You're looking so hardcore
                                                                  Oh no no no
Bridge:
                                                                  Solo:
В
           Α
If you've something to say
           Gbm
Don't be too direct
'Cause I feel a little fragile
                                                                  Chorus:
                         B
                                                                    Α
                                                                                 Gbm
Don't hit the nail on the head
                                                                  Oh baby, baby, let me down real slow
                                                                           B
Chorus:
                                                                  Oh no no no
                                                                        Α
                                                                  Let me strech out in the afterglow
             Α
Why I said, baby, baby
                                                                           B
                                                                  Oh na na na na
Gbm
            F
let me down real slow
                                                                  Solo 2 (arranged for standard tuning):
E
      В
Oh no no no
            Α
Why I said, baby, baby
                                                                   w/ slide
Gbm
           E
let me down real slow
                                                                   w/ slide
       В
Oh no no no
Verse:
                                                                   w/ slide
There's a swish in your step
                                                                   w/ slide
                        B
There's a gleam in your eye
Are you coloring your hair
                                                                   w/ slide
                       B
With some new kind of dye
                                                                   w/ slide
Bridge:
              Α
                                                                   w/ slide
                                                                                            fade out
