My friend veronica figured out some of the bass parts (I

should give
credit, of course, her email address is ) and I figured
out the rest of the bass and guitar line. The way how to play I will try to attempt to transcribe the guitar solo:
the guitar
line (as in most ska songs) is to mute the downstroke and play
                                       staccato the
upstroke and repeat. (That is you play downstroke first then

have not written down the lyrics because frankly, I cannot

understand most of
the words the lead singer is singing. But here goes the
bassline thingy.
The verses are the following:
                            Ab
(Intro)
                     Am
                                    Am
(played 2x)
                                      E -----|-5--5-5-5--5-7--7-7-

The first chorus is:

The song goes to another verse then the second chorus is:
                                      After that, there is yet another verse and the second chorus.

                                           is sort of like a bridge section which just plays Am
