

The Vamps - For You

Tom: **G**

Summer comes and when it fades you're in that little dress again, yeah

It's like a knife that cuts deep

And I can't bear to think about just how close we used to be

It keeps me up, I can't sleep

All my friends were lost but I was found

Then I threw it away when we walked on hollow ground

But I will run back into your arms

No matter where we are, if you need me to

If you still got some space in your heart

I would tear this world apart for you

We needed space and a little time, girl I hope you change your mind

And come back to me

Remember all the mornings you would make me late

I couldn't bare to leave you when you looked at me the way you do

All my friends were lost but I was found, yeah

Then I threw it away when we walked on hollow ground, yeah

But I will run back into your arms

No matter where we are, if you need me to

If you still got some space in your heart

I would tear this world apart for you

You're the star that makes my heart burn brighter

I would walk through the fire for you, for you

And if I'm there too late, mmh, yes

A couple things I got to say

But I will run back into your arms

No matter where we are, if you need me to

If you still got some space in your heart

I would tear this world apart for you

You're the star that makes my heart burn brighter

I would walk through the fire for you, for you

You're the star that makes my heart burn brighter

I would walk through the fire for you, for you
