The White Buffalo - I Got You

Tom: G

```
                           C                                      G
It ain't about your bitching or your devil's tongue
D                                      Em
I just wish that I was still the one
          C           D       G
Every single thought inside my head
              C         D      G
Telling me that this old heart is dead
          C      D        Em
But I ain't got no brains in my heart

        C
But I got you
      Em              G
In my veins, in my blood
          C
I got you
      Em                   G
Make me insane and boil my blood
          C                 G
Like there ain't no other love
C                       G
Hearts aren't always red
                  Em    C
They're black and blue
          G
But I got you

                         C                     G
It ain't about the dishes or your piles of junk
D                             Em
I'm just sick of you being drunk
           C      D     G
Every solitary bone inside of me
           C        D       G
Telling me that it's my time to leave
          C      D        Em
But I ain't got no bones in my heart

         C
I got you
```
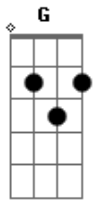

```
              Em           G
In my veins, in my blood
          C
I got you
              Em               G
Straight to my heart like a flood
                  C             G
Like there ain't no other love
C                       G
Hearts aren't always red
                  Em    C    D
They're black and blue
          Am  G   D
I got you
          G    D    Em
I got you

   Am
You can't touch the way I feel
          D                   G   D        Em
There is no end to what I'd steal for you
         Am
With love we have no free will
         D                   G   D     Em
We only get one heart to fill before it's through

              C
So I got you
      Em              G
In my veins, in my blood
          C
I got you
              Em               G
Straight to my heart like a flood
                  C             G
Like there ain't no other love
C                       G
Hearts aren't always red
                  Em    C    D
They're black and blue
          G
I got you
```
