

## The Wonder Years - We Look Like Lightning

```
tom:
                                                                I hear the ocean in the engine
                                                                I feel the moonlight creeping in
            [Primeira Parte]
                                                                Maybe it's all in my head
I forgot what month it is again
                                                                An unknown foreign presence in your bloodstream
                                                                I'm a stranger in my bed
I'm half awake
I know it's wrong but I swear to God it's almost Christmas
                                                                [Refrão 3]
In a language I don't understand
                                                                I'm playing
                                                                What song do you want to die to ?
There's a shaking voice on the PA
                                                                             G
The other passengers seem nervous
                                                                What song do you want to die to?
[Refrão 1]
                                                                What song do you want to die to?
I'm playing
                                                                What song do you?
What song do you want to die to?
                                                                (Bm D G)
                                                                [Ponte]
What song do you
[Segunda Parte]
                                                                I'm flashing back to us one night in a prairie town
                                                                (Tornado alley, outrunning a storm)
I'm suddenly aware of our speed
                                                                They can see the dirt there under my fingernails
Sew the world together tightly
                                                                (I'm just a pile of bones left on an airport floor)
Cinch the gaps with pins and string \ensuremath{\mathsf{Bm}}
                                                                The bags under my eyes have got space when you bottom out
And the beacon out there on the wing
                                                                (To pack your things and make a break for the door)
            Rm
It lights the clouds from inside out
                                                                One day the things you love are gonna put you in the ground
And from the ground we look like lightning
                                                                (But I'm planning on running 'til I can't anymore)
[Refrão 2]
                                                                [Final]
I'm playing
                                                                             G
                                                                What song do you, want to die to?
What song do you want to die to?
What song do you
                                                                What song do you, want to die to?
( Bm D G )
                                                                What song do you, want to die to?
[Terceira Parte]
                                                                What song do you?
                                                                What song do you?
I'm everywhere at once again
                                                                Em
                                                                What song do you?
```

## Acordes
