

# Third Eye Blind - Narcolepsy

Tom: **C**

Tabbed by: Kevin Brosky (3EBdude)

this on here so this is my tab.

First off, the tuning is: **Gb A D Gb A E** (sidenote: this is also the tuning for Forget Myself)

It also should be known that this is played in all one part. So it goes like this for the intro/verse:

That gets repeated several times. Let the chords ring and you should be able to figure out the timing from listening to the recording.

Then comes this part:

"I try to keep awake..."

"I can feel this narcolepsy slide into another nightmare..."

Then the distortion kicks in and you strum those beginning chords

That's the basis of the whole song. There is a lot that repeats. The only thing left I think would be the solo:

(Played only on the high **E** string, it goes pretty fast)

Ok, that should be it for this song. If I left out some little bits and pieces, it shouldn't be hard to figure them out using what I have hear. Just listen to the recording of it to get the timing and strum patterns down. Enjoy!

## Acordes
