

T.Mills - Go For It All

Tom: Eb

(com acordes na forma de Capotraste na 1ª casa D)

I dont wanna be okay, I just need to hear you say
When nothing really goes your way, tomorrow is a brand new day
Let me help you ease your mind, Imma make you realize
That tonights your night

Uh
I just want you to fly like a first class ticket on a mission through the sky

Never listen to the lies, keep me racing to the moon

I just be slighter than the whispers in the room

And them critics just assume you will never get do

All the things you really love, such a pessimistic view

Well let me tell you like mama told me

Everything comes back, its never always gon be

So mama never home, and papa never sober

You gotta keep climbin, the top is never closer

The truth is like a fight thatll take you to the white

And tomorrow gets brighter is you make it through the night, right?

You got it, they can never take it
They just gonna hate it cus they could never make it
Better days are coming in this thing called life
When rain go away a rainbow will say

Its alright

I dont wanna be okay, I just need to hear you say
Its alright

When nothing really goes your way, tomorrow is a brand new day
Its alright

Let me help you ease your mind, Imma make you realize
That tonights your night

So baby lets go for it all

Why? You can find a smile
We done made it to the sky, we aint never comin down
Remember all the nights you was wishin on a star
I told you if you fight itll get you from them all
See? You just gotta say
And I will bring you blue skies Ill make all your fake friends go away

All they do is throw shade
Its time to get the sunshine back and watch all these gray clouds blow away

Okay you got it, they could never stop it
They just gonna hate it cuz they could never top it
And even if you block it theres gotta be a way out
If our work pay off theres gotta be a pay out
Stay on start of bizzoc, stack your own brizzocks
Into a building when you was feeling light

Giving up you never did
So I just came to let you know that if you never hit
Its alright

I dont wanna be okay, I just need to hear you say
Its alright
When nothing really goes your way, tomorrow is a brand new day
Its alright
Let me help you ease your mind, Imma make you realize
That tonights your night

So baby lets go for it all

Keep your eyes to the skies

And baby, well go for it all

Dont ask why, thats just right
So baby, lets go for it all

I dont wanna be okay, I just need to hear you say
Its alright
When nothing really goes your way, tomorrow is a brand new day
Its alright
Let me help you ease your mind, Imma make you realize
That tonights your night
So baby lets go for it all
