```
This ain't goodbye
                                                                                                                                         It's not where our story ends \begin{tabular}{c} 
You and I were friends from outer space
                                                                                                                                         But I know you can't be mine
Afraid to let go, the only two who understood this place
                                                                                                                                         Not the way you've always been
And as far as we know, we were way before our time {\sf C} {\sf Am}
                                                                                                                                         As long as we've got time
As bold as we were blind, just another perfect mistake C $\mathsf{Am}$ \mathsf{G}
Another bridge to take, on the way of letting go
                                                                                                                                         This ain't goodbye

Oh no this ain't goodbye
                                                                                                                                         This ain't goodbye
                                                                                                                                         This is just where love goes {\color{red}C}
We were stars up in the sunlit sky
                                                                                                                                         When words aren't warm enough
That no one else could see, neither of us thought to ever ask
                                                                                                                                         To keep away the cold
It wasn't meant to be, maybe we were way too high C {\sf G} {\sf Am} {\sf Em}
To ever understand, baby we were victims of all
                                                                                                                                         This ain't goodbye
                                Am G
All the foolish plans, we began to divide
                                                                                                                                         It's not where our story ends
                                                                                                                                         But I know you can't be mine
