

Tristam - Burn

tom:

Db

Watch me burn, way up high

You could never hide, I see it all

As you watch me rise and watch me fall

Loving stare, if you find it bright

There's some shade down there where you can hide

But I promise you I'm on your side

[Refrão]

In the light, doesn't have to be so scary

Bright, let the warmth hit you so gently

I hope you know you're gonna be okay

You think it's you and I, but it's only you

You think it's you and I, but it's only you

[Segunda Parte]

Quiet wind, whispers in your hair

There's a peace inside that's always there

Where the chaos meets the tempered snare

[Refrão]

In the light, doesn't have to be so scary

Bright, let the warmth hit you so gently

I hope you know you're gonna be okay

You think it's you and I, but it's only you

You think it's you and I, but it's only you

You think it's you and I, but it's only you

You think it's you and I, but it's only you

It's only y?

(Bbm Ab Fm Gb)
(Bbm Ab Fm G)

[Refrão]

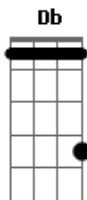

You think it's you and I, but it's only you

You think it's you and I, but it's only you

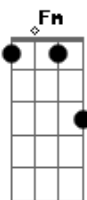

You think it's you and I, but it's only you

You think it's you and I, but it's only you
