                                                             Like him
She said that I make expressions like \mathop{\text{\rm him}}\nolimits
                                                             [Refrão]
        D7
My legs to my shoulders and my chin like him
              D7
                                                             Mama, I'm chasing a ghost
My waist and my posture like him
                                                                   G
                                                             I don't know who he is
Like him
                                                             Mama, I'm chasing a ghost
Like him, like him, like him
                                                                G
                                                             I don't know where he is
