

We Were Evergreen - Chromosomes

Tom: C

Intro:

G (just bass)

Out, out, out of breath,

It's about time someone mentioned it,

I don't want to be like everyone else

Roll, roll, roll about,
Like you have another have to live without,
Would you fit in the gaps, I never counted

Interlude:

G Bm C D
G Bm C D

Verse:

I'm, I'm unannounced,
I can just bounce 'til the morning comes,
I guess it saves the work, this is the workout

But, but, mine is yours,
Metaphasing is a daily chore,
Lost my place in the great chromatid now

Chorus:

All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me

All the other chromosomes

Interlude:

G Bm C D
G Bm C D

Verse:

Take, take, take control,
We will not crash if you're not involved,
In the great scheme of life,
We'll live without you

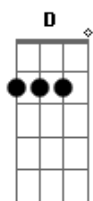

Girl, girl, on your own,
Battleship mount from the outer doors,
Fight against, what's the point?
Look at the odds

Chorus:

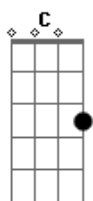

All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me
All the other chromosomes,
Walking past, walking past, but not me

Outro:
