

Wild Child (Folk Band) - Tale Of You & Me

Tom: **D**

[Verso 1]

Ever wonder why white clouds take flight in the middle of the night just chasing thunders tale

Ever wonder about you and me at the bottom of the sea while both our souls set sail

Ever think about me at night how I'm never too kind follow me cause you know I'll fail

Make you wonder bout heading home where your lovers can't roam stab your back throw you down the well

[Verso 2]

You ever think about both our mouths round the barrel of a gun make a fast won't feel a thing

Ever think about hanging out from the limbs of a tree swinging above our buried rings

You ever think about giving up take the pills drink the cup sleep for ever if you knew you could

Make me think about cutting close to the veins that hold love let it bleed out on the wood

Em Always said we'd die together now you'll die alone

[Verso 3]

You're always talking about this and that singing rattle a tat taking walks down by the moon

Can you think about getting old no I've ever been sold on eternity with you

Mama keep your thoughts of love and things burn your house and your dreams you know I love that devil's sin

Darling next time I grab your hand while we're walking by the sea know I just might throw you in
