Willie Nelson - Local Memory

Tom: A D Е And each night the local mem'ry comes around Е The lights go out each evening at eleven Each day I say tonight I may escape her Е And up and down our block there's not a sound I pretend I'm happy and never even a frown Е I close my eyes and search for peaceful slumber F F But at night I close my eyes and pray sleep finds me D And just then the local mem'ry comes around Α D But again the local mem'ry comes around D Α Piles of blues against the door to make sure sleep will come Rids the house of all good news then sets out my crying shoes no more What a faithful mem'ry never lets me down We're both up till light of day chasing happiness away He's the hardest working mem'ry in this town And each night the local mem'ry comes around And each night the local mem'ry comes around D Α Turns out happiness againand then lets loneliness back in
