

## Yuji - Old Love

When you were here The stars disappear Nothing can outshine the dress that you wear We should be dancing 'Cause girl you look stunning Let's spend the night together till reach the morning Up and above Never enough I want to hold your hand and show what is love When you are smiling And when you are laughing We should keep dancing to treasure the feelings Like it's the old love (it's the old love) This is the way that we both wanna feel Under the moonlight we made our first kiss 'Cause this is the moment that you made me feel Like it's the old love (it's the old love) Come on and hold me, I want you right here Stay close to me so you don't feel the fear I'll never let go 'cause I'm just right here When I'm with you It's like déjà vu Acordes
