Zayn Malik - Alienated

tom:

```
                C                G                C
No two people are the same
G                          C
Stand beside you, but just far enough away
G                          C
Last night we were drinking
                           G
Tried to think away the pain
    C
Made that age-old mistake
     G
Tried to disconnect my body
          C
From my soul, from my soul
G                          C
See, I feel alright already on my own

                  G       C       G      C
Can you let me be intoxicated on my own?
              G                  C
Do I need to answer or right my wrongs?
      G                  C
Am I home if I don't know this place?
               C       G         B7              Em7
And I've been feeling alienated,on my spaceship alone
C                                 G
Say goodbye to the past, leave it all with a laugh
            B7                    Em7
'Cause you always was right all along

G                          C
Know my reasons for the pain
G                                 C
But if you brought it in front of me
                           Bm7
I know I'd do it all again
                     C
Call them beer can gains
  G
```

```
I know from all the years
        C
That my feelings n?ver change

                  G       C       G      C
Can you let me be intoxicated on my own?
              G                  C
Do I need to answer or right my wrongs?
      G                  C
Am I home if I don't know this place?
               C       G         B7              Em7
And I've been feeling alienated,on my spaceship alone
C                                 G
Say goodbye to the past, leave it all with a laugh
            B7                    Em7
'Cause you always was right all along
      G                  C
Did the winds make the noise of change?
        G                           C
Can the wings on your skin help you fly away?
G                    C
'Cause it's always raining
        F7                  C             D
And the clouds are always grey when you're away

                  C        G         B7               Em7
Yeah, I've been feeling alienated, on my spaceship alone
        C                                        G
Say goodbye to the past (ayy, ayy), leave it all with a laugh
            B7                    Em7
'Cause you always was right all along
       G    C
All along
                          G
Say goodbye to the past
          C
Say goodbye
G    C      G
Ooh, ooh, ooh
       C
Ah, ah-ah
```
