Tom: C
                                                            We messed around until we found the one thing, we said we
                                                            could never ever.
Don't look around cause love is blind and darling right now I
                                                              If we died I'm not allowed to talk about it, but I gotta
                                                            tell it
I feel your pulse, slowing down and down, I can feel you.
                                                                Cause we are who we are, when no ones watching
  Cause we are who we are, when no ones watching.
                                                                And your right from the start, you know I've got you
  And your right from the start, you know I got you
